

Switches

Smooth operation, dependable performance, and safety are engineered into every Cooper industrial specification grade switch.

With over 300 individual products from which to choose, no one manufactures a broader range of industrial specification grade electrical switches than Cooper. Designed and built for outstanding durability and fast and easy installation, our toggle switches are horsepower rated for motor loads and available with standard key, Corbin key lock and tap-action actuation. You'll find single-pole, double-pole, 3-way and 4-way switches, as well as lighted/pilot-lighted units, and both momentary and maintained contact designs. All are built with heavy-duty straps and contacts, and strong thermoplastic components to ensure superior, long-lasting performance. And our specification grade decorator line can add a touch of style to showrooms, product demonstration areas, and conference rooms.
